## Customer profile

Mozido Inc. is a global e-payment company with business operations in the US, Mexico, Central America, the Caribbean, the Middle East, Southeast Asia and Africa.

The company serves 2 billion people around the globe and provides alternative cloud-based financial services for users who carry mobile phones but have no bank accounts. The Mozido financial platform integrates with different service providers, financial organizations and provides its API for cash transactions.

## Customer need

To comply with increasing customer demands and to deliver its products to the market faster than competitors Mozido decided to enlarge its platform functionality. Tight time lines and limited bandwidth of the in-house team made Mozido turn to the outside provider for assistance.

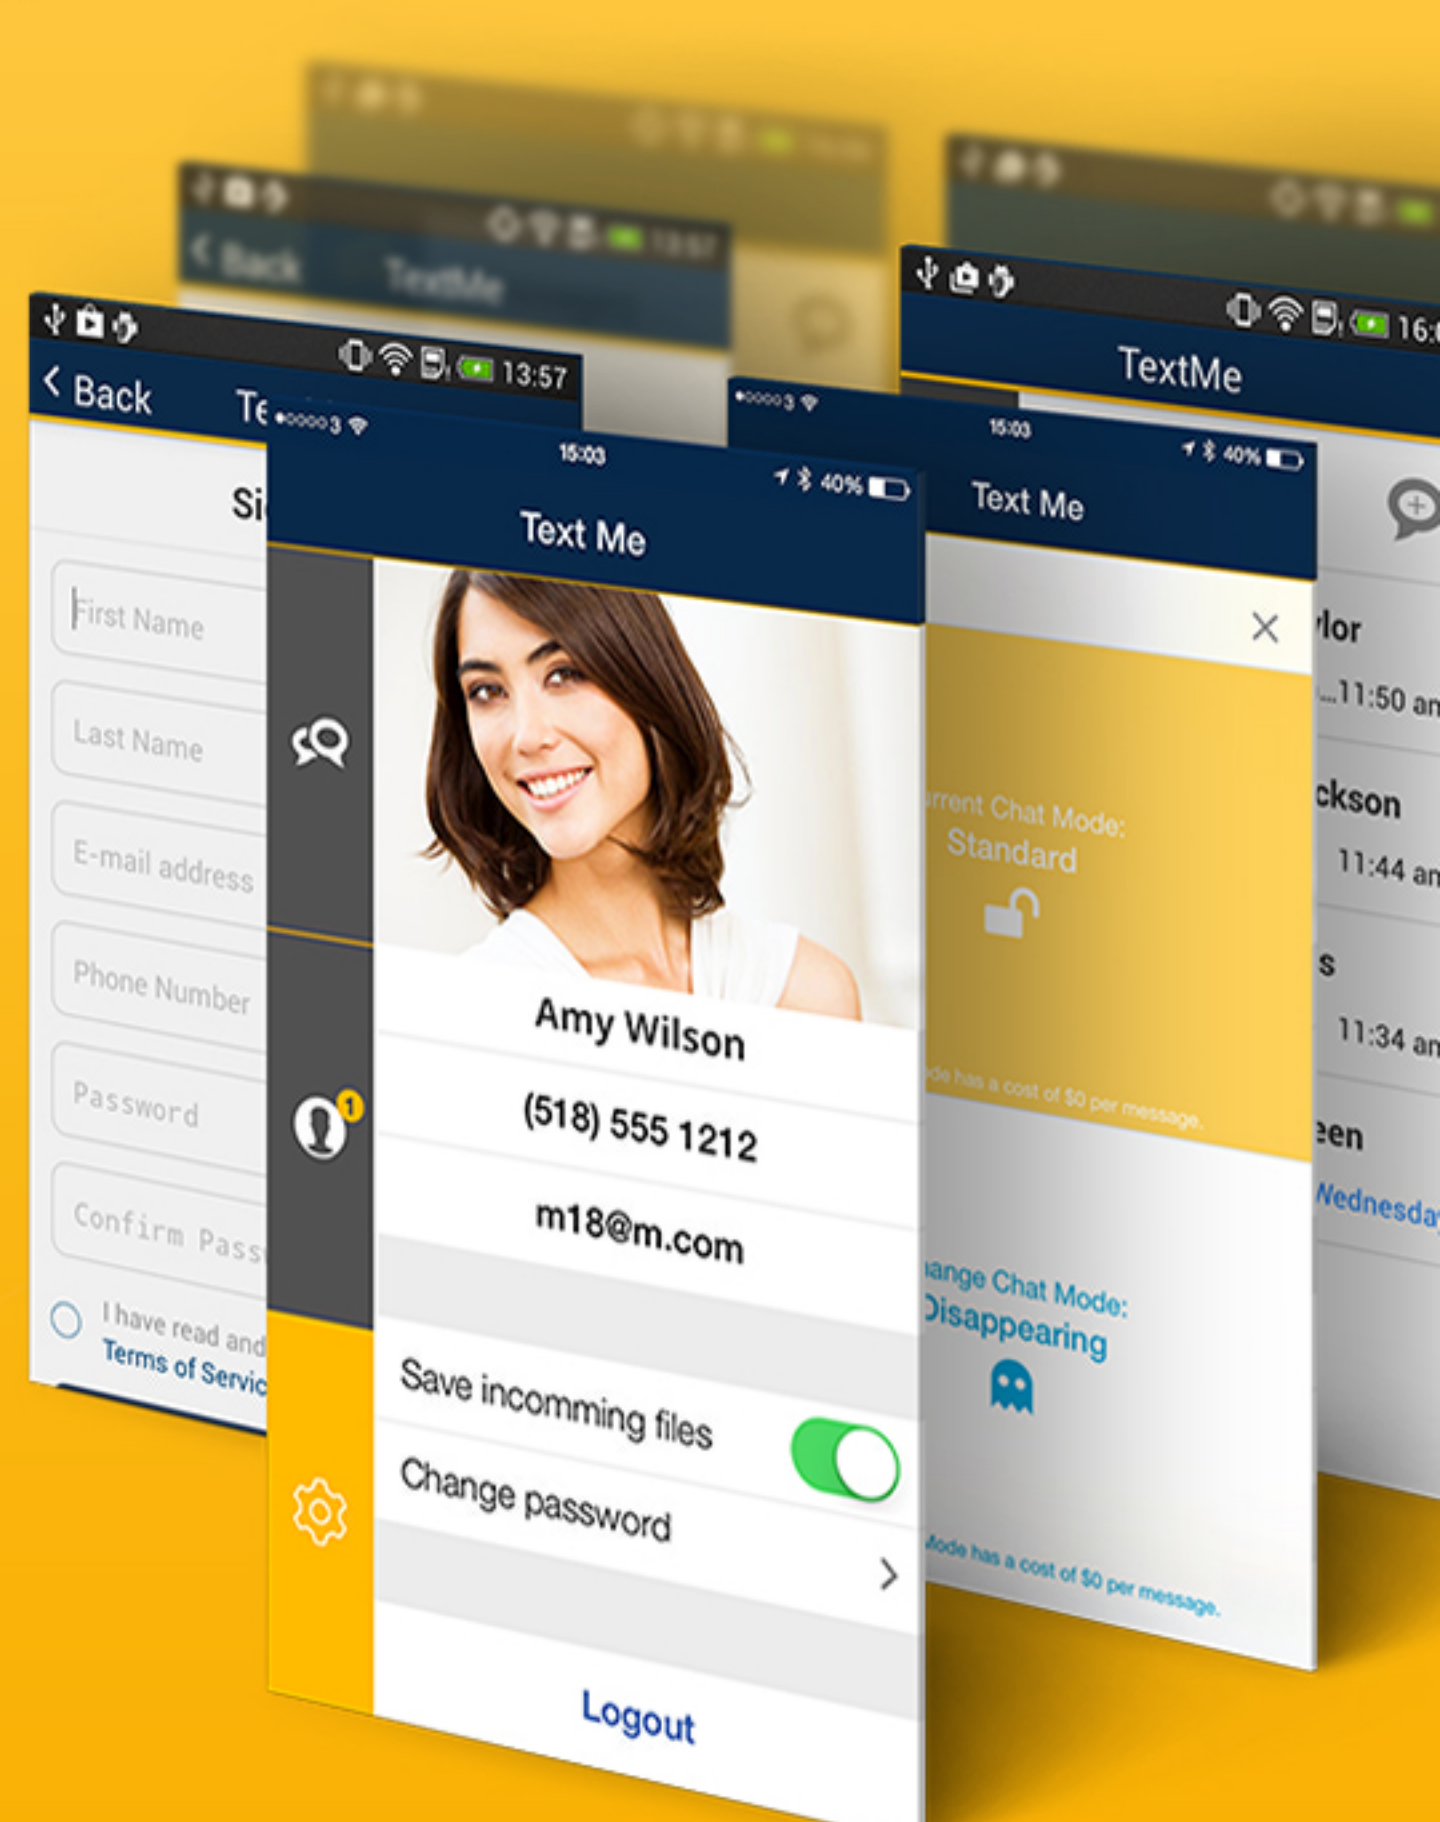

## Solution

Qulix worked in close collaboration with Mozido to lay out the project details, conducted deep analysis of the platform architecture and infrastructure, and worked out a clear roadmap for projects' implementation.

7 DEVELOPERS  
IN THE TEAM

Having quickly ramped up a team of 7 developers, Qulix Systems started working on several projects simultaneously:

- 01 Mozido.Mexico – payment transactions application integrated with Mexican service providers
- 02 Mozido.Jamaica – fund transfer application integrated with MoneyGram
- 03 Mozido.Dairy Queen – mobile application to work with online shops
- 04 Chameleon – a mobile financial application allowing end users to change the branding of the application upon their needs
- 05 Masquerade – application which allows users to get extra bonuses and special offers when they get into the iBeacon zone

## Technology stack

Servlets	Mixpanel	Kendo UI
Spring	GWT	J2ME
Hibernate	Bootstrap	Android
Liquibase	Maven,	iOS
JSON-RPC	Ionic	Apache Wicket
Cordova	Angular.JS	PostgreSQL

## Outcome

By partnering with Qulix for more than **3 years** Mozido was able to create **5 new applications** with significant **cost and time savings** while concentrating on business core activities. The business value of these applications resulted in customers' loyalty increase and target audience extension.

*"They are very quick to respond when we have sourcing needs. They have had some of the strongest developers out of the five or six offshore companies we work with. They seem to emphasize quality over quantity."*

Vice President of Innovation and Product,  
Mozido Inc.
