

# Development of Insurance claims management system for Helmes AS

## Case study

Client

# Helmes

Helmes is one of the largest independent software development companies serving the needs of the leading telecom operators, banks and insurance companies, logistics corporations and government institutions.

Business Need

Develop an insurance claims management system that allows sending claims to assessors for cost estimation

## Business objectives

- ✓ Automated and standardized checks of data and results
- ✓ Integrated checks against individual rules and/or partner agreements
- ✓ Less cash out by reducing administrative work
- ✓ Valuation of body shops
- ✓ Decreased time for administrative proceedings

## Project overview

### Main system features

- | Checks on the claim's completeness
- | Consistent, automated, electronic checks of cost estimates and assessments
- | Analysis of files and estimates of irregularities
- | Individual rules created with an easy-to-use tool covering calculation results
- | Individual check reports

### System Main Components

- | Calculation Parser
- | Rule UI
- | Rules Check Engine
- | Batch Calculation Processor
- | Transaction UI

## Testimonial

"Those Qulix people we have worked with proved to be real whiz kids with a wealth of experience. For that reason our cooperation with the Company has been a success for some years. Many thanks to our project team and the Company management. You've done a great job".

**HELMES Group AS Igor Menkov, CTO**
